

Warranty Commitment – Wooden Components

For the wooden components of our furniture, we provide a general warranty period of 10 years against rot damage, starting from the day the product leaves our factory in Önnestad.

Wood is a natural material that continuously changes over time. Variations in colour, irregularities, and small cracks are characteristic of the authenticity of wood and do not constitute grounds for a complaint.

The warranty requires that the wood is maintained regularly throughout its entire lifespan. We recommend inspecting your products at least twice a year to ensure that any algae growth, black mould, or dirt is removed. Avoid using high-pressure washers and chemicals that may damage the surface and make it more susceptible to future growth.
